DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a slot antenna array, classified in class 343, subclass 770.
 - II. Claims 12-32, drawn to an interrogation reader and antenna, classified in class 235, subclass 491.
 - III. Claims 33-52, drawn to cargo, forklift communication devices and methods for height of stacked objects using communication/wireless devices, classified in class 340, subclass 572.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II, III and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because any antenna producing the beamshape desired may be employed for interrogation and measurements as claimed. The subcombination has separate utility such as the antenna array may be used in any communications device such as cellular and broadcast communication systems without the particulars of the communications electronics recited.

Art Unit: 2821

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wimer whose telephone number is (703) 305-3555. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don K. Wong can be reached on (703) 308-4856. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
